

AVE home automation: integration with Vivaldi Giove FREENETMK2 sound system

AVE home automation is even more flexible: today DOMINA^{plus} offers - among its functions – also the integration with innovative Vivaldi sound system.

A totally **Made in Italy integration**: from now AVE **DOMINA^{plus}** home automation is able to interface with the **Vivaldi Giove FREENETMK2** devices in order to create an advanced and easily controllable **sound system**.

In fact, the **technology** of these devices allows to manage **up to 30 zones**, offering an **excellent acoustic quality and dynamic audio**, with power **from 25W RMS to 200W RMS** for each zone. It's possible to connect to the system different kinds of devices such as audio and audio-video sources (CD, DVD, BLU-RAY, ...), portable devices (iPod, tablet and smartphone, both iOS and Android), PC and NAS (server network), TV and monitor, amplifiers, SKY, Vivaldi Giove KEYSOL multisource with free app. In addition, the system can be further expanded with active subwoofers and Vivaldi PRO amplified speakers.

Through the **AVE home automation**, endless possibilities of control open up. You can manage up to **two AUX inputs**, the **USB port** for MP3 and Super Audio files, the addressable **Bluetooth** for audio streaming and the microphone for **baby control** calls. It's therefore possible to create **highly intuitive advanced sound systems**.

By the interfacing with AVE home automation, it's very easy to control the **Vivaldi Giove FREENETMK2 sound system**. From the home automation touch screens **DOMINA^{plus}**, through a **user interface with icons**, you can choose for each room your preferred audio source, adjust the volume, tones, and switch ON/OFF the acoustic speakers of every zone. Thanks to **AVE home automation's flexibility**, it's possible to manage the soundtrack even within the **Scenarios function**, in order to mark the various moments of the day or to create the perfect atmosphere according to the different occasions.

To complete the system, AVE also offers **finishing front plates** compatible **with Vivaldi Giove FREENETMK2** sound modules and **high performance flush mounting speakers** - perfectly **coordinated with all the AVE S44 wiring accessories series**. In this way, the client's aesthetic needs can also be satisfied and a solution of full continuity with the rest of the home automation system can be offered.

AVE home automation becomes more and more advanced, practical and functional, more and more open and ready to integrate quality solutions such as the **Vivaldi Giove FREENETMK2 sound system**. Today with **DOMINA^{plus}** you can design innovative home automation environments, where also the **music becomes smart** to increase comfort and satisfy the needs of even the most demanding customers.
