

Ave Touch door bell with touch control

Complete with customizable name tag, this solution enhances the "door bell" function with touch command and elegant front plates in glass or aluminum.

Ave Touch door bell is the perfect solution to meet the needs of a demanding customers. This device enhances the "door bell" function thanks to an **innovative touch technology** combined with the unique aesthetics of the **Ave Touch front plates** series.

Identified by a delicate LED light, that makes it immediately recognizable even in the dark, the **command can be easily activated** by touching the surface of the front plate, while a (excludable) buzzer offers you a call confirmation. The Ave Touch door bell is also complete with a **customizable name tag** with dedicated illuminated area (adjustable on different levels of light intensity).

Perfectly combined with Ave Touch series, this device can be completed with special front plates in natural and anthracite **aluminium** or in clear black, clear white, frosted water green and frosted silver grey **glass versions**.

Designed to characterize environments with a unique and distinctive aesthetics, **Ave Touch door bell makes it possible to enhance the function of the door bell** through touch command: an innovative solution that gives elegance and personality to a usually anonymous object.
