

Young 44 front plates with 1 and 2 central modules

The range of AVE Young 44 front plates is expanding. Now available in 1 and 2 module sizes, but with dimensions of 3 modules.

The revolutionary **AVE Young 44 front plate collection** is updating by introducing the **1 and 2 central module sizes** (code 44PJ01BT - 44PJ02BT), ideal for original and technological installations in hotels or residential settings, enhanced by the young, linear, and clean design that characterizes the entire range.

Made of **high-quality technopolymer**, the new Young 44 versions are products designed for professionals. For maximum installation flexibility, **they can be combined with both rectangular boxes and round or square ones**. They can be installed in the rectangular box with the 44A03 support, while for round and square boxes, they are combined with the 44A002 and 44A02VT supports, but with the appearance of a 3-module front plate.

Available in the **white Domus color**, the new versions with 1 and 2 central modules further expand the range of Young 44 front plates, which already includes elements with 2, 3, 4, and 7 modules for AVE S44 wiring accessories series.
