

## **AVE hotel automation: Touch Screen for room management with smartphone supervision**

***A high performance device that allows the management of hotel room's automation system and the visualization of hotel and tourist information, also via smartphone.***

The **AVE DOMINA hotel automation** system marks an important evolution in the field of hotel management, offering an innovative **Touch Screen to control the room**. This is the TS01 supervisor device, which has already revolutionized the home automation sector by making it more affordable, and now - in "Hotel Management" mode - it's ready to establish **new standards of comfort and automation** also for hotels, going to meet the technological needs of the guests.

In fact, behind an elegant **4.3" Touch Screen display**, there is a highly advanced control center that allows the management of the various functions, such as "**Do not disturb**", "**Tidy request**" or "**Fridge Bar Refuelling**". This device also integrates the display of **hotel information**, such as restaurant times for example, and **tourist information**.

If in the system, there is a concentrator function for special technological systems (code 53WBS-HUB) and appropriated configurations of Touch Screen TS01 in "Hotel Management" mode, it's possible the **local and remote control** of the room automation system and the whole hotel one, allowing to manage "**lights**" "**shutters**" and "**access control**". It's able to generate web pages - accessible from Internet browsers with appropriate login through the credentials released during Check-In - which graphically represent the functions of the room: so the guests can manage it comfortably from their smartphone.

The **AVE TS01 Touch Screen** boasts also aesthetic and installation solutions that allow it to be inserted in any hotel. To meet the different needs, both of the client and the installers, it can be oriented **horizontally or vertically**. With an encumbrance of only 11.6 cm in length and 12.65 cm in height, this 4.3" Touch Screen can be inserted and properly oriented in each room. The compatibility with **AVE S44 3+3 front plates** makes this supervisor suitable for any furnishing solution, providing ample possibilities: glass, metal or moulded front plates are available and - upon request - can be customized in order to report the **name and/or logo** of the hotel on their surface.

**The Touch Screen TS01 is a hi-tech solution with a smart accent**, that further strengthens the AVE proposal in the field of advanced hotel management. **DOMINA Hotel** is a system able to guarantee energy savings, comfort, functionality and design. It's also integrated with the main functions of the AVE home automation, which gives a wide availability of versatile and flexible solutions, both in terms of response for hotel requests and in terms of installation ergonomics. **DOMINA Hotel, a single system for every hotel needs.**
