

AVE ADDS THE NEW “DOMINAPLUS CONTROLLER” APP FOR iPad AND iPhone WITH THE ANDROID VERSION WHICH MAKES IT EASY AND QUICK TO MANAGE AND CONTROL THE DOMOTIC DOMINAPLUS SYSTEM.

Home Automation App for Apple and Android

This practical and essential application can be downloaded from Apple Store and Google Play making it possible to control numerous functions of the DOMINAPLUS domotic system from Ave

This application arises from the growing need to be able to control a domestic automation system in the most convenient and intuitive way. The new “DOMINAPLUS Controller” app for Apple and Android offered by Ave enables you to manage and control the various functions of the sophisticated DOMINAPLUS domotic system simply and quickly.

The simple practical application can be downloaded from the Apple Store site and Google Play (at a cost of 6.99 euro including VAT) and enables you to control numerous functions such as illumination, automation, temperature regulation, scenarios, control of electrical loads and related consumption, anti-intrusion and visualisation of IP-Cams.

The application brings up the visualisation and interactive control of all the information related to the status of the DOMINAPLUS domotic system with the viewing of graphic maps or images of the various environments over which the icons for the functions to be controlled are positioned.

The user can navigate from one page to another simply by dragging the finger over the display or using the icons that represent the functions to be controlled and link you to the various pages.

To facilitate navigation there is also a **menu subdivided into "functions"** available which enables you to identify the icon and the relative function in question. In this way the user can connect through Wi-Fi to the **touch screen** of the **DOMINAPlus** domotic system and easily navigate and control every room at home.

The presence of a **Touch screen device from Ave** and the possibility of using a wi-fi access point are the two conditions necessary for control of the **DOMINAPlus** domotic **system by iPad and iPhone.**

Ave also offers the possibility of remote control by means of the **REMOTE DOMINAPlus** service which can be accessed by taking out a subscription.

The application does not require any configuration but only some information related to the **IP address of the touch screen** present in the system and which can be found in the menu of the touch screen itself.

Ave domotics pushes beyond traditional domotics, it becomes even more convenient and functional, combining in a new experience the complete control of domestic functions, security and energy saving at any time and from anywhere with a simple gesture.

The price to the public of the **DOMINAPlus Controller** is 6.99 euro (plus VAT).
