

AVE touch technology at Ristorante 1994 of Padua

In Padua, the prestigious Ristorante 1994 has made its spaces even more exclusive thanks to the innovative Ave Touch commands.

AVE touch technology is elegant, distinctive, practical and functional inside the famous **Ristorante 1994 of Padua**, that chooses the elegant **Vera Touch glass front plates** to characterize its environments with a refined and classy touch.

Distinguished by a **unique minimalism** and declined in a **frosted silver grey finish**, Vera Touch commands embellish the **lighting design project**. In fact, **AVE touch technology** inaugurates a new contact with lighting in the Ristorante 1994. It's enough a tap on Vera Touch surfaces to control the light and connected devices. The eye-catching **blue LEDs**, that shines from plates' rear, identifies the exact point to touch, ensuring **full recognition of the commands** even when the atmosphere is suffused.

Positioned inside modern environments, **Vera Touch solutions** take also part in the furnishing project. Through **touch technology**, AVE gives a new face to the switch, that disappears, hidden behind **ultra-thin glass front plates**. Thus, the light points become integrated furnishing elements.

For technical rooms, **Domus 100 wiring accessories** were chosen and combined with **Moulded 44 front plates** proposing a rational solution of full **aesthetic continuity** with the rest of the electrical system.

AVE touch system has grown over the years, offering different **design options** such as those of the **prestigious Ristorante 1994**, a restaurant that can boast a refined classy location, crowned by the latest **AVE touch technology**.
