

NEW RANGE OF WALL MOUNTED IP40 DISTRIBUTION BOARDS: EASY TO INSTALL, DESIGNED TO LAST

Available in seven versions from 6 up to 72 DIN modules, these devices ensure high mechanical resistance and present technical characteristics which facilitate mounting and wiring.

Ave presents the new range of wall mounted IP40 distribution boards, an innovative series especially designed to simplify mounting and wiring. Now, the installer has at his disposal a wide range of products that are easy to install, durable, flexible, and for this reason suitable both for residential and industrial sector.

The new range of wall mounted IP40 distribution boards is made of seven versions from 6 up to 72 DIN modules that expands Ave's catalogue, which meet the most disparate needs. From small flat to villa up to industrial buildings, the new wall mounted Series fits different environments. The installer can rely on a single range for all his projects, always having a product live up to expectations.

Ave's IP40 distribution boards have technical characteristics that make them extremely resistant and durable. Built in plastic material (PC / ABS) which guarantees IK07 degree impact-resistance, the new wall mounted distribution boards offer a high mechanical resistance that ensures a higher longevity. Ave's reliability is confirmed again.

Design phase is focused to offer flexible and reliable products, but also to ensure maximum ease of use for insiders. **The new wall mounted IP40 distribution boards have many innovative and exclusive features:**

- Door panel opening up to 180°
- DIN rails removable separately
- Symmetric reversible door panel
- Side knock-outs cables passage
- Housing for terminal bars
- Screw covers for lead sealing

Installation is easy, fast, immediate. Thanks to their technical predispositions and large spaces, wall mounted IP40 distribution boards allow a professional mounting and wiring in the shortest possible time. Result of a constant commitment to offer simple and secure devices, this product range permits installer to avoid unnecessary efforts, saving time and reducing installation costs.

With **new range of wall mounted IP40 distribution boards**, which **adds to the Q65 Series**, Ave has managed to propose a complete, highly specialized, simple and practical solution that meets all installation requirements of residential and industrial sector.
