

TEKLA 44: only one series, everybody finds his style

TEKLA 44 is the newest AVE wiring accessories series designed to reduce costs and offer maximum flexibility, design and technologies for every need.

TEKLA 44 wiring accessories series is a precise choice from AVE, to meet its most demanding customers who love the details. In addition to its strong commitment to technology, AVE focused on aesthetics, offering **refined designs**, especially in materials, combining tradition, innovation and, above all, celebrating the personality of those who match them with their home interiors, as a true signature of style.

TEKLA 44 has been designed to **reduce costs without sacrificing quality**. Thanks to the exclusive softness of its **dark tone**, its matt black moulded elements fit with discretion in every interior. Installers, as well as end users, can save money by relying on a **complete range**, which makes it possible to satisfy all system requirements. In addition to the traditional elements that make up the system TEKLA 44 proposes also lightable toggle controls, USB sockets, shuko sockets, international standards sockets, RJ11 telephone sockets, TV sockets, RJ45 data sockets, anti-blackout lights and step marker lights, electronic thermostats and Chrono-thermostats, all perfectly coordinated with each other.

Only one series, everybody finds his style. Innovation for AVE means technology, design and exaltation of lifestyles. Thanks to the universal S44 support, when the TEKLA 44 products are already walled, you can choose and install different types of front plates in order to satisfy the frequent last-minute requests of final customers. This means **more flexibility** during building phase, but also **more freedom** for architects and designers, who can offer all the **S44 aesthetics and AVE technologies** in combination with the TEKLA 44 series:

- **Retro designs:** the past is in fashion. TEKLA 44 born in conjunction with AVE retro collections, that retrieves toggle controls' system make it topical again through front plates in aluminium, glass, Corian (New Style 44) and wood (England Style 44). The missing touch to give a new meaning to interior design.
- **Ave Touch, the light in a tap.** AVE makes touch technology a daily reality offering different design solutions. TEKLA 44 is the ideal system to complete electrical system with touch front plates in glass (Vera Touch), aluminium (Allumia Touch), and in moulded (Young Touch).
- **Traditional front plates, a stylish choice.** To complete a traditional electrical system you can choose through front plates in metal (Zama 44, available also in paintable variant), in glass, wood and aluminium (Vera 44), in moulded (Young 44, Moulded 44) and with customizable front plates (Personal 44).
- **TEKLA 44 is also home automation.** The new wiring accessories series matches perfectly to KNX technology and AVEbus proprietary system allowing to create advanced systems, in line with the living's evolution.

Flexibility and costs' scalability. The wide range of TEKLA 44 elements allows to create modern environments and to customize them according your own tastes and needs. **All AVE S44 front plates** – from plastic version to top front plates in glass and wood – **are compatible with TEKLA 44**. It's very easy to find the perfect combination to meet aesthetics and costs' requirements of each customer.

Choosing TEKLA 44 means choose **professional products** that are exclusively reserved to professionals of electrical sector. TEKLA 44 is the result of a highest know-how in this field, a concrete experience matured alongside architects, technicians and installers in order to offer maximum flexibility, combining it with materials, technologies and advanced solutions. All at a very affordable prize.

TEKLA 44: only one series, everybody finds his style.
