

## **AVE V44 EASY: 2-wire video intercom range**

***A professional stylish solution: easy to install and use, complete with internal and external units, including touch screens.***

AVE presents the **V44 EASY 2-wire video intercom series**. Characterized by a **refined bi-material design** in aluminium and glass, this collection has been conceived to facilitate professional work.

Programming is simple and doesn't require specific computer skills: the **2-wire system is easy to install and use**. The wiring with only 2 non-polarized wires makes the connection immediate, fast and error-proof.

AVE V44 EASY range has "Villa" external units for single, two and four-family houses, a side column for eight names and a "Building" outdoor station with 7" LCD display.

**The "Villa" external units** have a reduced width so that they can be installed on poles with 100 mm sides. The most important features are:

- camera which can be oriented in all directions;
- 2 relays for the management of the pedestrian gate and the driveway gate;
- MIFARE card reader for managing the main relay (feature available for single and two houses units);
- white illuminated tags removable from the front.

In addition to the "Villa" units, the **"Building" external unit** is also available, particularly suitable for installations with a high number of users. The main features of this solution are:

- 7" color touch screen display;
- visualization of the name list or the numeric keyboard;
- 2 relays for the management of the pedestrian gate and the driveway gate;
- MIFARE card reader for managing the main relay.

AVE V44 EASY also has several **internal units**:

- intercom handset;
- monitor with 4.3" display, whose installation is suitable for the smallest spaces;
- monitor with 7" touch screen display;
- WI-FI monitor with 7" display and remote management via APP.

Designed to ensure optimal image quality in any situation, the series adapts perfectly to every customer need thanks to the multiple proposals for interiors.

With the V44 EASY solutions, AVE expands its video intercom range **adding a complete 2-wire series**: easy to install and use, perfect to meet the professionals' needs.
