

AVE awaits you at Light + Building 2024

From March 3rd to 8th, AVE's innovation will take center stage at the Frankfurt fair.

Light + Building 2024, the leading international exhibition for technologies in lighting and building, **will serve as the platform for AVE's innovation**. From March 3rd to 8th, AVE will occupy a prominent position at the Frankfurt fair, showcasing the finest of its proposals in both technological advancements and design concepts.

The AVE stand (Hall 11.1 C51) will provide an overview of the solutions through which the company is redefining the concept of smart homes and buildings. Spanning over 160 square meters, the stand will feature **experiential stations** allowing visitors to engage with AVE's cutting-edge innovations.

Home automation will be the forefront, with proposals based on both the KNX standard and the proprietary AVEbus system. The latter will be enhanced further by the new **IoT-connected series** with ultra-thin design and Wi-Fi Mesh technology. The AVE stand will also feature new ranges dedicated to 2-wire and IP video intercom systems, as well as numerous proposals designed to meet the needs of various **international standards**.

Throughout the event, AVE technicians will be on hand to offer comprehensive insights and consultations on the showcased products and technologies.

AVE's participation in Light + Building 2024 underscores its ongoing commitment to driving innovation in the sector, offering cutting-edge solutions to meet the evolving needs of this field.
