

AVE DOMINA-Pro hotel management: efficiency, comfort, technology, security, and design

**An increasingly advanced automation system designed to be highly scalable,
from SMART features to energy savings.**

AVE redefines hospitality management with professionalism. The DOMINA-Pro Hotel Management System allows complete supervision of the facility and intelligent control of all functions and access points. **From small B&Bs to large hotel chains**, it offers flexible solutions that guarantee efficiency, security and ease of use for managers while enhancing the guest experience.

SMART technology for contemporary hospitality

Through **local and remote supervision**, staff can monitor and manage every area of the hotel, including rooms, the reception area, and common and technical areas. The system enables **digital check-in and check-out**, either directly at the hotel via the reception PC or remotely via AVE Cloud. The mobile app and web page can be used to generate access codes for the facility, indicating the start and end of validity and managing time slots. These can then be sent to customers.

The system is fully integrated with the S44 wiring accessories series and AVE professional home automation, as well as third-party devices and systems. This ensures high protection and reliability standards, even during periods of closure, thanks to **AVE AF927 anti-intrusion systems**. All visible devices, from card readers to room chronothermostats, are perfectly coordinated with the entire AVE wiring accessories series: **Domus (shiny white), Whitek (matt white), Tekla (matt anthracite), Class (ivory) and Allumia (tech grey)**, enhancing the value of Italian design and attention to detail.

The system as a whole enables **energy savings of up to 40%** through synergy between access control, air conditioning, lighting and automatic logic, optimizing consumption and improving the sustainability of the building.

AVE is a reliable partner for the hospitality industry

The DOMINA-Pro Hotel Management System is the latest embodiment of a philosophy that combines **innovation and efficiency** with the reliability of an internationally recognised, award-winning brand. With a presence in over 70 countries and a team of more than 350 professionals, including staff and a technical network, **AVE is a leading provider of integrated hotel solutions** for establishments of all sizes, including hotels, B&Bs, and other accommodation facilities.
