

AVE awaits you at Light + Building 2026

From 8 to 13 March 2026, AVE technology and design land at the Frankfurt exhibition (Hall 11.1 - Stand C51).

Light + Building 2026, the leading international exhibition dedicated to technologies for the world of lighting and building technology, will be the stage for **innovation by AVE**. From 8 to 13 March, AVE will occupy a prominent position at the Frankfurt am Main exhibition, where it will present the best of its proposals, both in terms of technology and design.

The **AVE stand (Hall 11.1 C51)** will be the beating heart of innovation, offering an overview of the solutions with which the Company is redefining the concept of the smart home and the intelligent building. Among the main new products present at the fair will be:

- **Home automation solutions** with proposals based on **KNX standard** and the proprietary **AVEbus system**, further enhanced by the **IoT connected wiring accessory series** with Wi-Fi Mesh technology.
- **Video intercom monitors** for the smart home: the new generation of monitors allows management of video intercom, anti-intrusion, wired and connected home automation systems.
- **Whitek 44**: the internationally multi-award-winning wiring accessory series. With its perfect fusion of style and functionality, it responds impeccably to the needs of a market increasingly attentive to quality, aesthetics, and technology.
- **New generation axial controls** ensure perfect alignment of the light point and reliability tested for over 100,000 operations, equivalent to more than 60 years of use.
- **Cylindrical toggles**: a contemporary must-have. AVE enriches its offer dedicated to toggles with metal cylindrical controls, which perfectly match the new collections of ultra-thin front plates.

Throughout the fair, **AVE technicians** will be available to visitors to provide in-depth information and consultation on the products and technologies on display.

Participation in **Light + Building 2026** reaffirms AVE's constant commitment to innovation: an indissoluble combination of technological avant-garde and excellent design. Thanks to solutions compliant with the main international standards, AVE responds promptly to the challenges of a constantly evolving global market.
