AVE hotel management solutions at InOut | The Hospitality Community

From 14 to 16 October 2026, AVE's innovation and design will take centre stage at the Rimini trade exhibition, a major event dedicated to the hospitality sector.

InOut | The Hospitality Community, Italy's premier event for the hospitality industry, will once again welcome **AVE's hotel management solutions** this year. From 14 to 16 October 2026, at the Rimini Expo Centre, AVE will participate as a partner within the **LET'S BE TOO.GETHER** exhibition—an immersive concept created and realised by **Simone Micheli Architectural Hero** (Hall B2, stands 014 - 020). Within this experiential platform spanning approximately 480 sqm, which recreates real-world settings tailored to the hospitality and contract sectors (a Reception Desk area, a Talk Lounge, a Bar Lounge, and a Networking/Meeting area), visitors can discover how **AVE technology** blends seamlessly with interior architecture to forge new paradigms in hospitality.

In this cutting-edge setting, **AVE's hotel management solutions**—designed to combine functionality, style, and innovation—will take center stage. The AVE system stands out for its ability to adapt to any type of property, from small B&Bs to expansive hotel complexes, and to integrate seamlessly with the latest developments in **home automation**. For proprietors and developers, this flexibility offers an ideal balance between operational reliability and ease of use, allowing every stage of guest reception to be managed with precision. Guests, in turn, enjoy an independent, **state-of-the-art stay**, from access control at the entrance to automated, personalised comfort control in their rooms.

This system is further enhanced by the distinction of **Made in Italy design**: the fully customisable front plates, coordinated with AVE's wiring accessory ranges, offer tailored solutions that meet diverse international hospitality standards, accommodating traditional, toggle, and touch controls. Highlighted among the range is the **Pills** collection of **ultra-thin front plates in Corian®**, designed for AVE by architect Simone Micheli. Alongside **Whitek 44**, it has clinched prestigious international accolades, including the Archiproducts Design Awards, the Red Dot Award, and the European Product Design Award.

The synergy between AVE and Simone Micheli Architectural Hero is renewed once more, showcasing its full expressive strength at **InOut | The Hospitality Community 2026**. This exhibition celebrates the flawless fusion of design excellence and a forward-looking vision for hospitality: an immersive journey where genuine connection, sharing, and human interaction form the **true pillars of tomorrow's guest experience**.
